

# Designing for Pedestrian Safety

## Workshop Closure

Designing for Pedestrian Safety – Workshop Closure

15-1

## Designing for Pedestrian Safety Learning Outcomes:

You should now be able to:

Describe the influence of planning factors: land use, street connectivity, access management, site design, and level of service.

Describe how pedestrians should be considered and provided for during the planning, design, work zone, maintenance, and operations phases.

Describe how human behavior affects the interaction between pedestrians and drivers

Identify good practices and effective solutions to enhance pedestrian safety and accessibility.

Designing for Pedestrian Safety – Workshop Closure

15-2

## Designing for Pedestrian Safety

Let's review at the expectation and issues you identified at the beginning of the workshop.

## Designing for Pedestrian Safety

What are YOU going to do differently in the future as a result of this Workshop?
